

## SUMMARY

Software Engineer with 4+ years of experience specializing in C# and Unity. In addition to game development, I have a working knowledge of JavaScript and ASP.NET MVC, contributing projects from design to deployment.

## TECHNICAL SKILLS

- Languages:** C#, JavaScript, HTML5/CSS3
- Frameworks & Tools:** Unity 3D, ASP.NET Core, Vite, Firebase, Git/GitHub
- Core Competencies:** OOP, SOLID Principles, Full-Cycle Development, Workflow Optimization, Debugging

## PROFESSIONAL EXPERIENCE

### Ministry of National Defence / Officer (05/2025 - 04/2026)

- Coordinated the modernization of existing projects.
- Planned the systematization and automation of core business processes.

### Toon Games / C# Developer (08/2023 - 04/2025)

- Led project management efforts, ensuring timely delivery and alignment with business goals across multiple software releases.
- Designed and developed core mechanics and features for high-performance applications using C#.
- Created internal tools and optimized workflows, significantly improving development efficiency and team productivity.
- Oversaw the end-to-end publishing process, including rigorous testing, quality assurance, and deployment for seamless product launches.

### Lecten / Unity Developer (10/2021 - 08/2023)

- Developed and maintained robust software solutions using C#, consistently enhancing performance and functionality.
- Designed and implemented internal tools to streamline the development process and increase operational efficiency.
- Contributed to project architecture and system design, ensuring scalable and maintainable solutions.

## SELECTED PROJECTS (GAME & WEB DEVELOPMENT)

- Bullet Evolve (Yso Corp):** Developed a hyper-casual shooter featuring dynamic evolution mechanics that alter bullet types and attack power. (*Google Play, 500K+ Downloads*)
- Clean Shooting (App Central):** Created an innovative shooter/cleaning game where players clear environments using various tools to earn upgrades. (*App Store*)
- Knit Tangled (Toon Games):** Programmed a creative puzzle game centered on untangling threads and connecting pieces to complete clothing. (*Google Play*)
- Interactive Playable Ad:** Developed a highly optimized HTML5/WebGL playable ad focused on user acquisition. Ensured strict bundle size limits and cross-platform compatibility for seamless integration with major ad networks.
- 3D Bin Packing Simulation:** Developed a comprehensive 3D pallet packing simulation tool using JavaScript implementing complex volume optimization and 3D rotation algorithms within a web environment.

## EDUCATION

Computer Engineering, Düzce University (2016 - 2021)
